

The poster features a dark blue header with the title "Severe Storm Spotter Training" in large white font. To the right of the title are the NOAA logo and the National Weather Service logo. Below the header is a photograph of a large, dark storm cloud with a bright lightning bolt striking down. To the right of the photograph, the event details are listed in white and yellow text. At the bottom right, there are logos for St. Charles County, St. Louis County, and Lincoln County, all with "PUBLIC HEALTH" or "HEALTH DEPARTMENT" text.

The Developmental Disabilities Resource Board of St. Charles County is excited to partner with NOAA and the National Weather Service and regional collaborators to bring our community an empowering Severe Storm Spotter Training experience.

This free, public event invites everyone—weather enthusiasts, community members, families, and lifelong learners—to come together for a dynamic two-hour presentation. Participants will learn how to confidently observe and report hazardous weather to the National Weather Service, gain insight into the science of meteorology, and discover practical strategies for staying safe during severe weather events.

We're committed to making this an inclusive and accessible experience for all.

ASL interpreters will be on-site, live captioning will be provided, and the venue is fully accessible.

Join us for an engaging, educational, and community-building event that helps keep St. Charles County safe and informed.
